

anatomy and visual demonstration provided show how and why to inject this region with hyaluronic acid fillers. Instead of using needles to access the treatment areas, a 27-gauge cannula is used to avoid pitfalls traditionally associated with the treatment. Because this is an off-label indication, it is likely that it will be one of the few examples of this type of injection that will show injectors how to do inject the region.

Injections of toxins finally expand beyond consideration of the basics (again, this limitation is partially imposed by on-label restrictions on continuing medical education). Whereas many discussions of toxin injections show a cartoon of the muscle and then a few injection sites that comply with the FDA-approved indications, this app demonstrates a dissection of the facial muscles with injections that target the muscles while also discussing the landmarks that enable an injector to find the correct area to inject. Injections of the orbicularis oculi muscle are displayed in a manner that allow the viewer to see each of the components that are clinically relevant as well as a means of correctly injecting each.

SPECIAL OFFER

Readers of *The Dermatologist* receive a limited time special offer to purchase the App for \$599.99—a 70% discount off the list price for the App. The offer runs through February 25, 2016 only. To receive this special offer, download the app, which is free, and then go to “essentials” and then click on “buy the lot.” For inquiries on the app purchase, please email info@completeface.net. In addition, there is a help/support button on both www.completeface.net. and on the app. ■

Dr. Beer is in private practice in West Palm Beach, FL. He is also a volunteer clinical instructor in dermatology at the University of Miami, a consulting associate in the department of medicine at Duke University, and shareholder and director of the Cosmetic Bootcamp meeting.

Disclosure: Dr. Beer is an owner of Theraplex LLC, and consults, speaks, or performs clinical trials for Medicsis, a division of Valeant, 3M, Sanofi Aventis, Bioform Medical, Allergan, and Stiefel, a GSK company. He is also a shareholder and director of the Cosmetic Bootcamp meeting.

OPEN CALL FOR SUBMISSIONS

Who? *The Dermatologist* is a journal that provides practical and clinical insights into today's general dermatology issues.

What? We are looking for top experts to share high-quality educational and informational articles for dermatologists.

How? Submit your case manuscript or commentary to dermeditor@hmpcommunications.com.

- **Manuscripts:** 750-2,000 words, please include images and/or graphics when possible
- **Case Reports:** 500-1,000 words, must include image and all case details including diagnosis
- **Commentary:** 1000-1,500 words, may be a narrative, anecdote, or editorial piece

the **dermatologist**

Note: All articles and case reports published in *The Dermatologist* must be original.
